Micro SD cards
SD cards
(available up to 1TB)
Extremely compact

Travel Routers
-GL-iNet Mango
-GL-iNet Beryl
-GL-iNet Slate

EDC kit ensures you have all of the necessary items to charge your devices with 12V, 110V, power brick (20,000mAh) or 12v battery via alligator clips. Ensure you have the proper adapters to transfer data among all common devices. USB and SSD drives not only store a ton of data for you, but can be also used as boot drives to rescue a computer, or run a live instance of something like Kali Linux, TailsOS or KodachiOS. Save a copy of important documents (DL, Passport, Licenses, etc) as well as your email and cell contacts. Add onto your kit with other items you may need out on the go.
